

CONNECTING THE BATTERY

Connect the battery lead supplied with your alarm panel to the battery connector clip. The red wire to the connector marked **POS +** and the black wire to the connector marked **NEG -**

Next connect the clip to the battery terminals. Battery **POS** to the **RED** connector and Battery **NEG** to the **BLACK** connector on the battery.

Lastly connect the white plug to the alarm panel marked **BATT**. **Note:** when plugging in the connector to make sure the red wire is aligned with the **RED** marking on the alarm panel.
